FRANK'S LYNCHING TOWN BARS SPIES

Strangers Are Being Expelled and the Police Force Is Being Increased.

Marietta, Ga., Aug. 30.-The citizens of this place have placed a ban on inquisitive strangers since the lynching of Leo M. Frank. Guards are on duty and close watch is kept on all newcomers. If the actions of persons arriving prove suspicious they are quietly informed of the hour when the next train leaves.

Eight men whose conduct aroused sus picion and who did not give satisfactory explanations of their presence here were rounded up late Friday night, placed in a box car of a freight train about to leave and sent away. No arrangements. as far as could be learned, had been made with the railroad to transport these persons out of town, but the car was guarded until the train left the town limits.

Since Frank was lynched here on Aug. 17 several persons whose business in the town was not known have been invited to leave. Five men who had the appearance of laborers and said they were seek ing employment here were ordered away They could not be found yes terday. In the opinion of the police they did not seem to make a serious attempt to get work.

The eight men sent away Friday night also appeared to be laborers. The continual receipt of letters threatening vengeance on Marietta because of the lynching of Frank has caused the city authorities to add 15 men to the police force.

Letters are being received from all parts of the country by town and Cobb county officials and by persons who have given interviews on the Frank case to newspapers published outside the state.

AUTOMOBILE OVERTURNS.

New York, Man Seriously Injured Hinsdale, N. H.

Hinsdale, N. H., Aug. 30 .- H. M. Rice of Brooklyn, N. Y. about 45, lies at the point of death at the Ellicott City hospital in Keene as a result of being injured in an automobile accident about two miles from this town on the Keene road about noon Saturday. He has concussion of the brain.

Brody-McClellan company of New York, was touring in this section with his son. H. M. Rice, jr. They left Antrim Sat-urday morning and were returning to New York. Mr. Rice turned out for an automobile into a stretch of road which was recently oiled. The car, which was going about 20 miles an hour, skidded and plunged through a fence and down a 12-foot embankment. The automobile turned completely around and landed bottom up, pinning Mr, Rice and his son beneath. Help was summoned, and the couple were taken from beneath the automobile and first aid rendered. Mr. Rice received serious if not fatal in-His son escaped with a few

WHAT \$10 DID FOR THIS WOMAN

The Price She Paid for Lydia E.Pinkham's Vegetable Compound Which Brought Good Health.

Danville, Va. —"I have only spent ten dollars on your medicine and I feel so much better than I did when the doctor was treating me. I

don't suffer any bearing down pains at all now and I sleep well. I cannot say enough for Lydia E. Pinkham's Vegetable Compound and Liver Pills as they have done so much

for me. I am enjoying good health now and owe it all to your remedies. I take pleasure in telling my friends and neighbors about "-Mrs. MATTIE HALEY, 501 Colquhone Street, Danville, Va.

No woman suffering from any form of female troubles should lose hope until she has given Lydia E. Pinkham's Vegetable Compound a fair trial.

This famous remedy, the medicinal ingredients of which are derived from native roots and herbs, has for forty years proved to be a most valuable tonic and invigorator of the female organism. Women everywhere bear willing testimony to the wonderful virtue of Lydia E. Pinkham's Vegetable Compound.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pink ham Medicine Co. (confidential) Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

JOHN D. LONG DEAD IN MASS.

Ex-Governor of Bay State and Former Secretary of the Navy

HAD FINE AND HONORABLE CAREER

Veteran Lawyer and Public Servant Dead After a Three Days' Illness

Boston, Aug. 30 .- John D. Long, former secretary of the navy and former governor of Massachusetts, died at his home at Hingham Saturday night. Mr. Long's death was generally unexpected. He re turned from a trip from Maine two days ago suffering from an intestinal trouble with which he had been afflicted for several years. He was ordered to rest by his physician, but reports that his condition was critical were denied.

in Buckfield, Me., his birthplace, the former governor was hurried to Hingham Thursday evening and uraemia developed. SNEERED AT BY ROOSEVELT

Turns Guns on Wilson Administration Foreign Policy

DERIDES NOTES AS BREEDING CONTEMPT

Charges "Criminal Deterioration" in Navy in Past Two Years

New York, Aug. 80,-An open and bitter attack upon President Wilson and his cabinet was made by Col. Roosevelt last night in a statement issued at his home in Oyster Bay. The ex-president opened all his guns, and while basing Just What It is and the Methods by his assertions on his controversy with Secretary of War Garrison over his address Wednesday at Plattsburg, he strayed into other channels, and in his New Bedford, Mass., Aug. 30 .- Follow- Sharges and criticisms covered practione of the most prominent architects of country because of the troubles with

The colonel seized upon statements diday. That night he became worse and Bullard may have been responsible for ty he had been awaiting to supplement his statement of Friday, and make a di-They regard Bullard's confession as rect issue between the Wilson adminis-Pierce Long, his son, and Miss Bertha astounding because of his high standing tration and himself over the country's lack of preparedness to enforce its rightful demands upon other nations and to protect its citizens. He charged that the For six months, the police have had country is held in contempt by Germany and that the Lusitania and Arabic would not have been sunk had we started to prepare for war 12 months ago, and adopted a firmer course in Mexico.

> In his remarks-a reply to the colsonel' statement of Friday-Mr. Garrison said, among other things:

"As to his assumption that I object to the making of strong pleas for prop-er military preparedness, it would be impossible for him to entertain a more unwarranted one. I have gone to the limit of my vocabulary in an endeavor to make such pleas just as strong as words could make them. If he has found some stronger than I was able to find, he runs the risk that I will borrow them. He will, I feel sure, permit me to do so much without requiring me also to borrow his ideas, that our present state of one of the most respected citizens for gage in war with four or five other

The colonel after accepting this as a wish on Mr. Garrison's part to dissassociate himself from the Wilson administration, plunged into the fray. He called President Wilson's message of last and one published by Professor Charles mber an "elaborate plea against such unpreparedness," and charged that SENT ACROSS N. E. no effort had been made since to pre pare for war.

By inference at least, Col. Roosevelt asserted that Mexico had seen fit to defy the United States and make it neces surv to land marines at Vera Cruz be cause the administration was unable to back up its ultimatum by deeds. The Mexican incident he referred to as "a small and ignoble war" ending in "ignominous retreat." He accused Mr. Wilson ie spoke of as another small war. Mr. Garrison was criticised severely

for failing to bring the regiments of the army to the standing they should have even when there was no indication o trouble in the air.

Secretary of the Navy Daniels was acused of culpable misconduct in failing to have the proper fleet exercises and permitting the marksmanship to fall off uring the past two years. Col. Roosevelt, it is known, has been

anxious for just the opportunity which was provided for him by the Plattsburg speech, the censure of Gen. Wood by scretary Garrison and Mr. Garrison's eplies to his utterances. He is ready to do his part in making it an issue which he hopes would bring about the defeat of President Wilson, if Mr. Wilson should be renominated in 1916.

Mr. Roosevelt has been urging the ountry to prepare for war for some months, but up to the present time had not been able to stir up any controversy with administration officials which gave

TONNAGE OF A VESSEL.

Which It is Measured.

To find the tonnage or displacement of a ship is rather puzzling. The ton- Bend, Neb., the bluffs are conspicunage of a ship is the measure of its ous and consist of loess and glacial cubical or carrying capacity expressed drift, overlying the Benton shale. This in tons. At the present time there are shale was formed when Nebraska was four methods in use of expressing the at the bottom of a sea. Evidence of tonnage of a ship, known respectively the former presence here of sea water as the gross tonnage, the net register is found in the fossil shells of oysters tonnage, the deadweight tonnage and and other animals that live in sait wathe displacement tonnage.

In calculating the gross tonnage the whole interior capacity of the ship below the tonnage deck is found, including that of all covered in spaces on deck used for stowage, and the result in cubic feet is divided by 100.

The net register tonnage is the gross tonnage minus all the spaces used for the accommodation of the crew and instruments and the working parts of the ship. It is on the net register tonpage that almost invariably dues are

The deadweight tonnage is the measure of the exact amount of cargo that a ship can carry without sinking too deep in the water.

The displacement tonnage is the space occupied by the ship in the water. The amount of water displaced by a ship is, of course, equal in weight to the ship and all it contains. As one ton is equal to thirty-five cubic feet of water, the displacement tonnage is found by dividing the number of cubic feet of water displaced by thirty-five when the ship is immersed up to its draft or load line.-London

GEOLOGIC PERIODS.

Stories of Time Told by Fossilized Plants and Animals.

Scientists besitate to estimate geo logical time in terms of years. Such estimates have, however, been made, Schuchert in 1910 states that about 12,000,000 years have clapsed since the close of the carboniferous age, an age, as the name suggests, in which great deposits of carbon, in coal, were being formed in many parts of the world. This age has been divided by geologists into the Mississippian, Pennsylvanish and Permian epochs, of which the Mississippinn is the oldest and the Permian the youngest. The Pennsylvanian epoch alone is estimated by Schuchert to have covered 2,160,000 the remark, "Everybody knows that years, and animal life is supposed to have existed on the earth for over 14,-000,000 years before that time.

Geologic periods are recognized primarily by the animals and plants that lived in them, so that the study of fossils plays a very real and important part in the progress of geologic knowl-

Rocks of carboniferous age, as shown by their fossils, have a wide distribution in the United States, and they are apt to abound in these remains of plant and animal life. The fossil shells which are found in them, however, may vary greatly from point to point, because the animals they represent lived in different periods of geologic time or in different regions in the carbeniferous ocean,-Argonaut.

Languages.

The principal languages of the world are listed in order as follows: English, spoken by more than 150,000,000 people; German, more than 120,000,000; Russian, more than 90,000,000; French, more than 00,000,000; Spanish, more then 55,000,000; Italian, more than 30,-000,000, and Portuguese, more than 30,-000,000. These seven are the principal languages of Europe and America. There are said to be 3,424 spoken languages or dislects in the world-1,624 In America, 937 in Asia, 587 in Europe and 276 in Africa. Among other important isnguages are the Chinese, Japanese, Scandinavian branches, Sis- the ocean's full of sait. The rocks and venic speeches and dislocts and the various languages of India, Persia, Arahis and modern Greece.

NEBRASKA IN THE LONG AGO.

What Is Now a Dry Plain Was Once the Bed of a Great Sea.

South of Platte river, opposite North ter and the bones of such sea monsters

as the mosasaurus. A comparison of these ancient conditions with those of the present day indicates the slow, continuous change that is now and always has been in progress. Where the tourist now travels comfortably over a dry plain these monsters sported in the water of the sea long ages ago. On the shores of this ancient sea lived equally strange beasts and birds of types that have long been extinct, and over its water sailed great flying dragons-the ptero-

dactvls. The animals of that day were strikingly different from those of the present. The birds, unlike any now living, had jaws armed with teeth. The monarchs of the air then were not in fact birds but flying reptiles, whose fore limbs had been medified into wings by the enormous elongation of fingers between which stretched thin membranes like the wings of a bat. These flying dragons, some of which had a stretch of eighteen feet, were carnivorous. They were animated engines of destruction that somewhat forcibly suggest the modern war airplanes, of which they were in a sense the prototypes.-Geological Survey Bulletin.

CORRECTED HIMSELF.

The Judge Made a Mistake and Was

Quick to Admit It. It was an action against an insurance company in a civil court to recover the value of a quartz mili that had been burned. The defendant introduced the former foreman of the mill, who testified that the plaintiff had admitted to him that he had set fire to the mill in order to get the

insurance money. The presiding judge knew the witness and had a very lew opinion of his veracity. He also knew the plaintiff to be an honorable and upright man, wherefore he burst forth with

to be a lie." Whereupon the counsel for the insurance company sprang to his feet in a rage. "I object to the language of the court," said he, "and I demand that he be taken down and my objec-

tion entered in the record." "Certainly, Colonel Brown," said the court. "You are quite right, and the court was altogether wrong to making such a remark. The court will endeavor to correct the effects of its inadvertence. Gentlemen of the jury, I instruct you that you must disregard my remark. You are the exclusive judges of the evidence and of the credibility of the witnesses, and it must have no weight with you that I commented as I did upon the fact that the witness told one of the most infernal lies that were ever uttered in a

courtroom."-Case and Comment. Placing His Kicks.

I de not wish to kick about this glad and smiling earth, for I have only landed here by circumstance of birth, I find it quite a pleasant place. I'm willing to remain. Please do not understand me as destring to complain, and yet there are some changes I should like to recommend-not as a carping critic, but a calm, impartial

friend. The tropics are too beastly bot; the frigid zones too cold. Too much exertion is required to dig for iron and gold. The continents are far too large; mountains constitute a very grievous fault. The scheme of raining water from an accidental cloud is westeful, undependable and should not be allowed.-Cincinneti Commercial Tribune.

The Unexpected. "Before engaging rooms in your house," said the buchelor, "I want to know if there are any families with

"I'm afraid there is," replied the

"Well. I was just going to uny," comrisued the other, "that if there are I want you to put me in the room next to theirs. I want to wake up in the night and henr their trouble, so that I can congrutulate mywelf again that I'm not married."-London Telegraph.
